

Catosal™

(10% Butaphosphan+cyanocobalamin) Sterile Solution

Catosal™ is now available in the U.S.

Catosal from Bayer:

- For the prevention and treatment of phosphorus and vitamin B12 deficiencies in cattle, swine, horses and poultry.
- Contains Butaphosphan, a unique organic phosphorus, and cyanocobalamin (vitamin B12), in an injectable form.
- An important adjunctive therapy for animals that are convalescing or susceptible to behavioral or environmental stress.
- Helps veterinarians and producers worldwide resolve B12 and phosphorus deficiencies in pre- and post-partum dairy cows.
- In clinical trials, the administration of Catosal has been associated with enhanced recovery rates for ketosis associated with DAs.
- Available by prescription only from your veterinarian.
