

**Upside Down.**

**QuickBayt® Turns Fly Control**

# Scatter where you can. Spray where you can't.

Gravity doesn't mean much to house flies. They land on the ceiling as easily as they land on the floor. And everywhere they land, they can spread disease. But with QuickBayt® Spot Spray on the ceiling and walls, and QuickBayt Fly Bait on the floor, virtually everywhere flies land, flies die.

## **QuickBayt® is engineered to lure flies into certain death.**

All QuickBayt formulas:

- Use imidacloprid, a potent active ingredient that starts killing flies in less than 60 seconds<sup>1</sup> and lasts up to six weeks.
- Are effective against flies resistant to organophosphates and pyrethroids.
- Contain two strong attractants that flies can't resist.
- Contain Bitrex®, a bitter agent that helps prevent accidental ingestion by animals.

QuickBayt Fly Bait and QuickBayt Spot Spray are ideal for:

- Livestock facilities
- Poultry houses
- Dairy barns
- Feed yards
- Outbuildings and workshops

## QuickBayt Spot Spray: fly control where you need it.

- Treats places where QuickBayt Fly Bait granules can't reach, including walls, posts, beams and ceilings.
- Spray directly onto surfaces where flies tend to rest, indoors or outdoors.
- Easy to spray out of reach of livestock and other domestic animals.
- 1 lb container makes 1 gal of solution, enough to treat 1,000 sq ft of fly-resting surfaces.

## QuickBayt Fly Bait: easy, economical and effective.

- Scatter directly from the container onto dry, level surfaces; put granules in bait stations; or hang disposable strips.
- Available in 350 g container, 5 lb or 40 lb pail, and disposable strips.
- 350 g container treats over 2,000 sq ft.
- 6 oz treats 1,000 sq ft.

## Where flies used to rest, now they die.

From floor to ceiling and every place in between, flies land almost everywhere. But with QuickBayt Fly Bait and QuickBayt Spot Spray, where they land is where they die.
