

PROTECTING YOUR PET WITH K9 ADVANTIX™: A Dog Owner's Guide

Once a month application of K9 Advantix is an easy and convenient way to protect your dog from the dangers of fleas, ticks, and mosquitoes. Nothing else offers this kind of triple protection for pets. And it is gentle enough for puppies 7 weeks of age or older and dogs of any size.

STEP 1: Starting at your dog's shoulder blades, part the hair.

STEP 2: Apply product evenly and directly to the skin in three or four spots along the dog's back by squeezing out the tube's contents.

STEP 3 : Be sure to empty the entire tube by the end of the application. Your dog's natural movements will help spread K9 Advantix over the skin.

FOR USE ON DOGS ONLY

If applied to a cat, or ingested by a cat, contact your veterinarian immediately.

Due to their unique physiology and inability to metabolize certain compounds, this product must not be used on cats.

For medical emergencies, call 1-877-258-2280.

K9 Advantix™ protects dogs young and old, small and tall.
